

MOTOTRBO™ Solutions Catalog

Radio Dispatch via Remote VoIP Console for
Voice, Text, Email and GPS Location Services

*safe*mobile

Introducing **SafeDispatch™** for client-based radio dispatch solution. SafeDispatch™ enables MOTOTRBO™ users to host and manage their radio communication display on their own computer, without incurring any monthly fees associated with web-based applications.

This robust application provides Call Logging, Voice Recorder, Text Messaging, Email Gateway, Automatic Vehicle Locator (AVL), Outdoor GPS Tracking and Telemetry features in a client-based solution.

Solution Overview

SafeDispatch is built for worldwide coverage by leveraging maps from Google and Microsoft MapPoint with the ability to customize customer-supplied maps for a highly tailored solution. It also provides language customization to fit local market needs.

Functional Capabilities

SafeDispatch offers location-enabled features providing critical information about your mobile assets around the world on real-time 24x7 basis, including:

- Speed and heading information
- Unit status on/off
- Historical data
- Polling/immediate location reporting
- Landmarking
- Geofencing
- Alarms

MOTOTRBO Solutions

Motorola Application Developer Program extends the capabilities of the MOTOTRBO platform and provides unique solutions for diverse communication needs.

Whether it is GPS-based tracking or radio fleet management application, certified application developers can work with you to develop a customized data application to enhance your business communication.

(1) Text Messaging Module

Text messaging capability facilitates SMS communication between the radio and the dispatcher. The dispatcher can send messages to any radio unit or radio groups while receiving messages from all radios in a dedicated output screen in the SafeDispatch application.

(2) Email Module

Email function allows radios to send and receive messages to and from any email address. The dispatcher can communicate with any mobile assets from his email account at home without having to run the SafeDispatch application on his computer.

(3) Voice Dispatch Module

With Voice over IP feature, the dispatcher can directly communicate with the vehicle drivers using the SafeDispatch application. It also enables the recording and logging of calls at the same time.

(4) Reporting Module

SafeDispatch generates a variety of reports for easy data interpretation. The dispatcher have access to MOTOTRBO Automatic Registry Service (ARS), Speeding Report, End-of-Day Report, Stops Report, Fleet Report, Geofencing Report, Landmark Report and many others.

(5) Telemetry Module

The dispatcher can monitor on and off switches that are integrated into the system. It provides useful features as vehicle on duty/off duty and door open/close.

SafeMobile, Inc. is the leader in GPS technology for Mobility and IT Solutions to provide effective ways to monitor your mobile assets. Located in the United States with offices worldwide, the company is a certified worldwide application partner for Motorola.

System Specifications

Required radio hardware:

- MOTOTRBO R1.4

Required IP technology:

- TCP/IP connectivity (LAN,WLAN,VPN)

Minimum computer hardware requirements:

- Operating System - Microsoft Windows XP Professional w/Service Pack 2
- CPU - Intel/AMD 1600 Mhz or greater
- RAM - 1.0 Gb or greater
- Hard Drive - 40.0GB or greater
- Ethernet Card - 10/100 LAN
- USB 2.0 High Speed, Internet available

Required knowledge:

- Basic computer understanding and windows system knowledge

Industry Application

- Public safety and government agencies
- Airports
- Corporate and trucking fleets
- Oil and mining
- Taxi and limousine services
- Utilities
- Residential and industrial cleaning
- Public and student transportation

Geographical Coverage

- Asia
- Australia
- Africa
- Europe
- Middle East
- North America

Order-to-ship Cycle Time

- One business day

For customization of the system, special quotes and shipping times are available on request.

Supported Languages

- Arabic
- Czech
- Chinese
- English
- French
- German
- Romanian
- Russian
- Spanish
- Turkish

Mapping Options

- Google Maps
- Microsoft MapPoint
- MapInfo Maps
- Raster or vector maps in compatible formats with MapInfo

SafeDispatch Applications

Model Number :	PMDN4156
Description :	SafeDispatch - Demo Package Includes 10 SafeLocator MOTOTRBO Licenses and Remote Installation. Only available for a time sale per dealer; - Not to be used for commercial sale
