- Utilities

Combined Communication Solutions Pty Ltd has over 50 years of experience in radio communications. The company is a Motorola Radio Communications Premier Dealer and Motorola Application Developer. They are a leading supplier of communications equipment in Australia, providing design, supply and installation services.

THE CHALLENGE

There are many challenges to overcome in fleet management. You need to ensure safety and security for your drivers and vehicles. Increase productivity as costs escalate. Optimise time and schedule management, responding quickly to unexpected changes or problems. And ensure the fastest response in case of emergencies.

THE SOLUTION

An effective fleet management helps you increase operational efficiency and deliver better service and results. With accurate location data of your personnel and vehicles, you can optimise schedule and productivity.

MOTOTRBO™ portable, mobile and repeater.

# SOLUTION OVERVIEW

TURBO TRACK

Turbo Track is a secure web-based tracking system, text messaging and emergency response solution for the MOTOTRBO™ digital two-way radio platform. The application enables users to view their fleet of vehicles, personnel and assets anywhere in the world from the internet.

INTRODUCING TURBO TRACK FOR EFFECTIVE FLEET MANAGEMENT

Managing a large fleet of vehicles or mobile workforce is time-consuming and difficult to coordinate. To have an effective and productive workforce can be a logistical challenge.

Having reliable knowledge where your workforce is located and the ability to clearly communicate is critical to business efficiency and success. By having location data, text messaging and clear voice communications enables your employees and business operations to perform productively and reduce costs. By combining these enhanced features with emergency call handling, you can ensure higher standard of occupational safety and health (OS&H) with peace of mind for your business.

KEY FEATURES

- Web based mapping
- Web access
- Secure Login
- Supports Cellular and Satellite devices
- Text Messaging
- Emergency response email/short message service (SMS)

SYSTEM SPECIFICATIONS

- Computer running Windows XP, Vista or Win7
- USB port for each control radio
- Internet connection
- 2GB RAM min
- Can be shipped preloaded on personal computer

SUPPORTED LANGUAGE

- English

GEOGRAPHICAL COVERAGE

- Worldwide

OTHER REQUIREMENTS

- Basic IT knowledge

ORDER-TO-SHIP CYCLE TIME

- Ship upon order process
- Can be loaded remotely via VNC or similar

PRICING INFORMATION

- Available upon request

DEMONSTRATION

- Available upon request
