APX SPEAKER MICROPHONES OFFER ENHANCED AUDIO CAPABILITIES.

These APX Remote Speaker Microphones and Public Safety Microphones have been designed to include the same speaker that is in the APX portable radio. These microphones deliver audio that is clearer, more intelligible and up to 50% louder than XTS-series RSMs.

The windporting feature dramatically lessens background noise from high winds and other severe weather conditions. The same technology prevents water from clogging the microphone port and distorting transmit audio, ensuring a user's confidence of clear communication.

When a user speaks directly into a noise canceling remote speaker microphone, the noise-canceling acoustics utilize a directional microphone that is designed to eliminate ambient noise—ideal for outdoor communication.

* Intrinsically Safe: Motorola approved accessories are a critical part of the specific radio and accessory system certified by a recognized testing organization as intrinsically safe. Non-Motorola approved accessories are not certified as part of the overall Motorola APX system. Use of non-Motorola approved accessories could result in equipment that is unapproved or unsafe in a hazardous environment.

** Rugged accessories and batteries exceed industry standards (IPx7) for submersibility and provide a higher level of water protection—MIL-STD-810E, Method 512.3 Immersion. These accessories and batteries meet the incremental requirement of submersion in 1 meter of fresh water that is 27C colder than the product.

Whether it's a whisper during a covert operation in a dark alley or commanding a noisy fire scene, Motorola's exclusive IMPRES audio accessories are designed to optimize its output based on the accessory worn. A covert officer whispering into his IMPRES 3-wire surveillance microphone is heard clearly by his commanding officer. A police officer directing traffic in a windy rainstorm is heard by the dispatcher even though his microphone port has been exposed to water.

THERE ARE 4 DIFFERENT SIZES OF BATTERIES IN THE APX PORTFOLIO

ADVANCED IMPRES BATTERIES AND CHARGERS

We know that when heading into the burning building or staking out a hostage situation, first responders need to be assured their batteries will last. Motorola's exclusive IMPRES smart energy system provides automatic, adaptive reconditioning, end-of-life display that maximize talk-time and optimize battery cycle life—all automatically. Batteries can be safely left on the charger without damaging the battery and batteries are kept fully charged, so you can be assured they are always ready when you head for a call.

** International Protection (IP) is a global standard for rating dust and water protection. The first digit IP5x or IP6x represents increased levels of dust protection, while the second digit, IPx7 represents withstanding submersion in 1 meter of fresh water for 30 minutes. Rugged batteries exceed industry standards (IPx7) for submersibility and provide a higher level of water protection – MIL-STD-810E, Method 512.3 (Immersion). These batteries meet the incremental requirement of submersion in 1 meter of fresh water that is 27C colder than the product for 2 hours.

CHARGERS

IMPRES SINGLE UNIT CHARGER

Ensures maximum talk time and optimized battery cycle life. Automatically reconditions IMPRES batteries based on actual usage, keeping them in peak condition. This is a compact, rapid rate, cost-effective charging solution. All APX radios and batteries are compatible with this charger.
