

*Assure Instant
Communication with
Two-way Radio
Call Boxes...*

Communicate without wires or monthly operating fees.

Whether used within a corporation or college campus, recreational area, shopping center or transportation system, Call Boxes provide a swift and reliable way for employees, visitors and customers to communicate to a monitoring station. Two-way based Call Boxes allow for integration into most existing radio systems and provide direct access to personnel connected to the system. Connectivity's design allows for expansion of security coverage and can help improve response time without the need for additional personnel. Call Boxes provide an affordable and reliable way to communicate with and secure the most remote locations.

Not only can Connectivity's Call Boxes integrate into most existing two-way radio systems, but they are also upgradeable should a user's radio frequency change. Built-in voice chips give audible instructions to users requiring assistance, and each unit has an automatic Call Box ID and location identifier so responding personnel can provide aid.

ORDER INFORMATION

Call Boxes can be ordered from Motorola – by phone, fax or online. After an order is received, resellers will receive a call direct from Connectivity to request the radio information needed for proper programming of the Call Box board. Authorized Motorola dealers can have Call Boxes shipped with or without radios to allow for their own programming and installation. Resellers who are not authorized to purchase radios from Motorola can request to have Call Boxes shipped with Motorola radios fully installed by Connectivity.

All Connectivity Call Boxes Include:

- Voice Instruction Message for User
- Automatically Announces Call Box ID and User Location
- Courtesy Light
- Easy Push-to-talk Operation
- Silent Tamper Alert Broadcast to Security
- Low Battery Alert
- 40-day Standby Battery Capacity
- One 12 Volt, 12 Amp/Hour Rechargeable Battery
- Call Box Keys and Tamper-resistant Screw Bits
- 1-Year Warranty on Call Box;
5-Year Warranty on Solar Panel

safety

security

service

Call Boxes help provide additional security without the extra personnel.

Expand Safety and Security

Commitment to employee and student well-being can be addressed by placing Call Boxes on campuses and in company parking lots.

Just opening the Call Box door or pressing the button on models without a door will enable instant, reliable and effortless notification (ID and location) to one individual or to a team of security and/or emergency personnel. And automatic audible instructions help guide users... step-by-step. Crystal-clear, two-way voice or voice and visual communication enables responding personnel to quickly assess the user's needs.

Vandalism has been addressed with a tamper-alert, which will only be heard by designated staff when triggered. Input and output connectors are accessible for expansion peripherals; such as, lights, camera, motion, smoke, gas, water detection devices and gate entry.

Users can enjoy the convenience of making dinner reservations at the clubhouse.

Increase Revenue

Patrons at resorts, golf and tennis clubs, theme parks and other recreational areas can enjoy the convenience of a Call Box. They'll be able to place drink and lunch orders, make dinner reservations at the clubhouse, or call for service.

Our "hands free" unit is the perfect communication solution for restaurants without drive-up windows. The narrow frame and portability of this Call Box makes placing it in strategic locations for takeout orders a breeze.

The potential for increased revenue and happier patrons makes a Connectivity Call Box system an easy choice!

Call Boxes can be easily placed in remote or inaccessible areas.

Flexibility

Call Box portability will allow units to be deployed before, during and after disasters. They can be placed at the command posts of medical, fire/paramedic, security, military and emergency planning and relief agencies. Following a disaster, they can be tactically placed in remote and inaccessible areas as the critical link between people. Call Box features include the ability to quickly change messages to suit temporary language requirements. This helps make these systems a "must have" in every community.

A144 Call Box

*Compact and accessible!
All of the features of the
10 foot outdoor model in a
sleek 4 foot frame.*

At four (4) feet tall, this Call Box unit combines the flexibility of wall or pole mounting with convenient accessibility and the security of a strobe light to assist respondents. This unit is ideal for parking facilities including garages and remote lots, as well as hospitals, community swimming pools, stadiums, and factories.

Available in either solar or AC/DC power, the white, powder-coated, aluminum enclosure is .090 inches thick and measures 4'H x 14"W x 7.5"D. It includes a 6-watt locator LED that converts to a strobe light when a Call Box is activated. This Call Box comes standard with a 10-watt solar panel and choice of large reflective vinyl message decal.

Effortless and affordable! This Call Box is designed with golf communities in mind.

The A106.5 Call Box is the only free standing solar-powered Call Box of its size on the market today. It's ideal for golf courses, marinas, college campuses and more. If solar power or AC/DC is not an option, don't worry, the A106.5 can be shipped with an extra battery and charger. When the Call Box battery needs to be replaced, the unit will automatically send a voice prompt, so loss of service is never an issue.

A standard base stand is included for hard surface installation. This white, powder-coated, aluminum box is .090 inches thick and measures 6.5'H x 10"W x 5"D. It includes an antenna and choice of reflective vinyl message decal.

A1 Call Box

The affordable A1 Call Box is ideal for recreation areas.

The attractive A1 Call Box combines a unique design with rugged durability. It's field programmable to allow voice messages to be easily changed for special events.

This Call Box mounts on a wall, PVC or aluminum stanchion and is available in either solar or AC/DC power. The aluminum enclosure has a white powder-coating, is .090 inches thick and measures 13"H x 9.5"W x 6.5"D. Perfect for indoor and outdoor use, this Call Box provides protection against dust and falling rain. It includes an antenna and set of small reflective decals.

The .090 inch thick, aluminum stanchion measures 10'H x 10"W x 5"D. It includes four light openings, an internal 60,000CP blue strobe light, light-opening lens covers made of clear plastic and AC/DC power supply.

*The open-face
ACB Call Box provides
maximum accessibility.*

The ACB Call Box provides quick, push-to-talk communication. Because there is no door to open, it is easily accessible. It's ideal for making restaurant, hotel or taxicab reservations, or announcing a delivery at an entry door.

The indoor/outdoor wall mount aluminum enclosure has a white powder-coating and is .090 inches thick. It measures 20"H x 14"W x 7.5"D and features a thick, clear Lexan faceplate cover. It includes an activation ringer, antenna and set of small reflective decals.

*The advanced
MACPlus Call Box provides
four customizable buttons.*

The MACPlus Call Box features a four-button notification panel that can be tailored to user requirements – for example, medical/police, mechanical/towing, gas/tire and hearing impaired. It's ideal for roadways, bridges, tunnels and commuter rail stations.

The software-driven system sends automatic audible and digital signals to a dispatch center and is ADA compliant. Call Boxes alert the dispatch center every 24 hours with a status report.

The powder-coated, stainless steel enclosure measures 15"H x 11 3/8"W x 7"D and features a self-closing pneumatic/mechanical door with ADA-compliant hinges. It includes an activation ringer, help-enroute LED light, set of small reflective decals and a 2 inch pole/wall mounting bracket. This unit requires the separate purchase of the software package listed below for programming the four call buttons.
