

COMMUNICATING HAS NEVER LOOKED BETTER. OR BEEN EASIER.

# MOTOTRBO™ SL SERIES ACCESSORIES

From the manager's desk to the conference room and beyond, MOTOTRBO™ digital radio solutions keep you instantly connected and in control with an incredibly sleek and light digital radio for discreet communications. Our SL Series radio has professional business capabilities, like enhanced work order ticket management, vibrate alert, covert mode and large, full color display, to empower people like never before.

The SL8550 / SL8050 accessories enhance your professionalism – with forward-thinking features like integrated Bluetooth® and Intelligent Audio – so you can remaster your productivity and image. That's why it's critical to choose the only accessories certified to perform best with MOTOTRBO radios.

## ENHANCE MOBILITY WITH INTEGRATED BLUETOOTH

Whether a construction site senior supervisor is responding to a team worker's request or a security team is covering a special event, sharing information instantly, easily and seamlessly is critical to any business. So we embedded Bluetooth audio right in our MOTOTRBO radios to make communications even more convenient. Our exclusive Operations Critical Wireless earpiece handles loud environments while an optional wireless push-to-talk (PTT) links to any earpiece to enable more covert communications. Just put the PTT in a pocket or on a lapel and connect instantly.

## MOVE FROM HECTIC TO HUSHED

Our SL Series radio offers a smart feature—Intelligent Audio—that adjusts radio volume to fit the environment's noise level. Intelligent Audio also works with select audio accessories, giving you even more communication flexibility.

Connect an SL8550 / SL8050 accessory and the Intelligent Audio automatically adjusts radio volume and filters out background noise, drastically improving the level of audio clarity. Now, managers won't miss a call when making a tour of a noisy manufacturing facility nor will they disturb others as they walk past colleagues holding an important meeting.

## TALK COMFORTABLY AND COVERTLY

Our single-wire swivel earpiece and surveillance earpiece are small, sleek and powerful, so you can communicate easily wherever you walk and talk.

The transparent coiled cord and rubber earbud on the surveillance earpiece offers greater discreetness for security operations. The flexible-fitting swivel earpiece is comfortable, even for extended shifts. Both earpieces have an inline microphone and push-to-talk, making communication easier and unobtrusive.

Add compact carrying accessories – like a swivel carry holder or a lightweight wrist strap – and you’ve got flexibility and comfort that meets the needs of the busiest professionals on your organization.

## THIN IS IN - FROM BATTERIES TO CHARGERS

From the standard cell phone-sized batteries to the micro-USB charger that plugs directly in the wall, we designed our SL Series accessories with portability, professionalism and convenience as our top priorities. Both the standard and high-capacity batteries are so slim and lightweight that it’s easy to carry spares.

Our unique multi-unit charger merges high power with high image, too. You can charge six radios simultaneously and recharge a battery in the top slot whenever a radio is removed. This charger is both functional and sleek in design.

### BLUETOOTH WIRELESS ACCESSORIES

89409N*	HK200 Bluetooth Earpiece
NNTN8125*	Operations Critical Wireless Earpiece with 12" cable
NNTN8126*	Operations Critical Wireless Earpiece with 9.5" cable
