

PUBLIC SAFETY SUPPORTING PUBLIC HEALTH

COMMANDCENTRAL AWARE

This is an unprecedented moment in our history. With the COVID-19 outbreak threatening our global health, frontline responders are called to act now more than ever, joining together to fight the spread of this disease. Amid this global crisis, Motorola Solutions is committed to supporting the critical communications, safety and security needs of our public safety customers.

Improve your response by enabling existing features of the technology you already own. With CommandCentral Aware, mobilize rich intelligence to the Emergency Operations Centers (EOCs) as the COVID-19 crisis escalates. Quickly respond and improve responder safety with automatic map alerts that pinpoint the out-break in real-time.

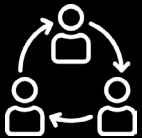

EMERGENCY OPERATIONS CENTERS (EOCs)

CommandCentral Aware provides a platform for Emergency Operations Centers (EOCs) to operate with all relevant data sources at their fingertips and integrate real-time intelligence into the agency's arsenal in fighting such a crisis like this pandemic. This real-time intelligence is absolutely paramount to keeping first responders safe and critical in minimizing the risk of spreading contamination.

Data Sources:

Seamlessly and remotely communicate with field personnel keeping them informed and updated of all-hazards occurring throughout their jurisdiction as well as those occurring in contiguous jurisdictions that may indeed have a collateral impact on their own.

Collaboration:

Support emergency management information flow by expediting the integration and analysis of multi-sourced data and services through inter-agency collaboration. Collaboration that will save lives, protect property and maintain the operation of essential facilities.

Unify Operations:

Connect CommandCentral Aware with your Crisis Information Management System, Land Mobile Radio (LMR), Video Management Systems (VMS), and other software platforms. EOCs can accelerate workflows, improve ease of use, augment decision making and unify operational viewpoints.

Public Data Feeds:

Utilize public data feeds as sources/feeds/layers into CommandCentral Aware for COVID-19 relevant data sources.

Relevant Web Pages:

Provide relevant COVID-19 relevant web pages within the CC Aware tabs to provide it in the overall Aware UX.

ADDITIONAL CONFIGURATIONS		RECOMMENDATIONS
	<p>Review additional CommandCentral Aware recommendations to help improve response today.</p>	<ul style="list-style-type: none"> Leverage Avigilon™ cameras to monitor medical shelters, hot-spots or other areas of interest. These camera feeds can be monitored via CommandCentral Aware to relieve the need for personnel to monitor the area in person.
		<ul style="list-style-type: none"> Expand the use of Vigilant/ WatchGuard ALPR (automatic license plate recognition) systems to help control security and health zones within an impacted area.
		<ul style="list-style-type: none"> Leverage CAD incident data to define rules engine actions to filter and pin content in the event monitor.

OUR MISSION	
	<p>Motorola Solutions builds software for mission-critical environments where every second matters. CommandCentral software suite puts your information to better use, improves safety for your teams and restores your focus on the communities you serve. Backed by a trusted, 90-year veteran with proven public safety leadership, our suite is transforming the public safety experience.</p>
