

DEVELOP A STRATEGY TO CONFIDENTLY MEET COMPLIANCE REQUIREMENTS AND FIGHT CYBER THREATS

CREATE A PLAN TO GET ON THE PATH TO COMPLIANCE

Developing a security strategy for compliance is critical in highly regulated sectors like energy, transportation, healthcare and public safety. Our regulatory experts can assess current conformance, identify critical areas for implementation and create a plan to get you on the path to compliance.

BUILD CYBERSECURITY READINESS SKILLS AND CONFIDENCE

Evaluate where your organization stands in its journey to meet and maintain regulatory compliance.

Document your cybersecurity program's strengths and accomplishments and key shortfalls — before the auditors and examiners do. Our compliance experts can provide data-driven, prioritized recommendations and expected return on investment to inform better your cyber risk management and decision-making.

Services include virtual Chief Information Security Officers (vCISOs), Vendor Assessments and Business Continuity/Disaster Recovery Planning.

Our consultants evaluate your compliance program and provide a baseline view of where you stand currently compared to regulatory requirements. Get a customized, risk-based, prioritized action and investment plan to ensure you're prepared.

ACTIONABLE PLANS

Identify specific actions to improve compliance and prioritize investments

BASELINE REPORTING

Get a scorecard report against regulatory requirements and peers

EXPERT RESOURCES

Virtual CISOs provide leadership to build effective compliance programs

KEY FEATURES

GET EXPERT ASSISTANCE FROM A VIRTUAL CISO

Our seasoned Virtual CISOs (vCISOs) can provide advisement services, governance overviews and compliance assessments to function as the Swiss Army knife of cybersecurity in your organization. Virtual CISO services can be delivered remotely and offer a cost-effective way of filling gaps in your executive team while you search for an in-house CISO or fill in for team members on leave. For some organizations, a vCISO offers sufficient expertise to avoid the cost of hiring and maintaining a full-time headcount.

DEVELOP AN ACTION-ORIENTED RESPONSE PLAN

Once cyber attacks have occurred, it's too late to prepare. We'll help you develop an action-oriented plan around responding to cybersecurity incidents that will coordinate and engage the entire organization in a full-spectrum response from the CEO or head of your agency, down to the technical incident responder. Our Incident Response (IR) Planning exercises are based on our deep expertise in cybersecurity as well as years of experience in mission-critical systems and public safety.

MEASURE VENDOR OR SUPPLIER SECURITY READINESS

Some of the biggest cybersecurity incidents in recent years have happened as a result of attackers exploiting gaps and vulnerabilities at third-party organizations to move laterally to other targets. Our team works with you to understand your risk landscape and remediation options by identifying potential cyber threats that third-party vendors, partners and suppliers might unwittingly introduce. Our experts craft a full-spectrum strategy to discover, measure and reduce risks.

BE READY FOR BUSINESS CONTINUITY/DISASTER RECOVERY (BC/DR)

Disasters can strike at any time without warning - and when they do, time is of the essence to reduce the impact on mission-critical systems and operations. Do you have a plan in place if your IT systems go down or your staff has to relocate due to events out of your control? Our consultants can help you identify critical systems in your environment and help create a data-driven response plan to reestablish connectivity and ensure your organization is up and running again quickly.

MOTOROLA SOLUTIONS - YOUR TRUSTED PARTNER

As a leading provider of mission-critical solutions, we understand your mission can only be as secure as your partners enable you to be. Our goal is to provide you with transparency, accountability and security that's built-in from the start.

We believe that our set of highly knowledgeable people with industry certifications, best-in-class organizational policies and procedures, and state-of-the-art automation and analytics tools enables us to uniquely deliver enhanced cybersecurity solutions that address your needs today and in the future.
