

# STAY DILIGENT: PROTECT YOUR VESTA® 9-1-1 SYSTEM WITH CYBERSECURITY SERVICES

## CYBER ATTACKS CAN LEAD TO DOWNTIME

As cyber attacks become more frequent and sophisticated, and mission-critical communications networks become interconnected to other IP-based systems, prevention and proactive risk management are critical. In addition, finding and retaining qualified cybersecurity professionals is more challenging than ever. As a result, Public Safety Answering Points (PSAPs) must consider next-generation cybersecurity solutions to better detect and defend against advanced threats.

## STAY AHEAD OF THREATS

Protecting people starts with protecting the PSAP, and public safety organizations need mission-critical systems and networks to be fully available and resilient to cyber attacks. The risks to organizations are growing as threats like ransomware become increasingly profitable for cyber criminals.

Antivirus solutions, firewalls and unmonitored intrusion detection systems are no longer enough. Attacks can bring mission-critical communications down, cost millions to resolve and result in lost trust and damaged reputations.

With the ongoing rise in cyber threats to PSAPs, it's critical that agencies implement a holistic approach that focuses on assessing risks and deploying 24/7 Managed Detection and Response (MDR) services that include Endpoint Detection and Response (EDR) to enable rapid threat detection and remediation.

Motorola Solutions MDR Plus service includes EDR capabilities, along with signature and anomaly-based network intrusion detection and log analytics to further protect your VESTA 9-1-1 system.

## SYSTEMATIC APPROACH TO MITIGATE RISKS

### DETECT

Proactive event monitoring & automated alerts

### ANALYZE

Real-time analysis correlation

### INVESTIGATE

Incident investigation and evaluation

### REPORT

Advanced data analytics

## KEY CAPABILITIES

Highly trained, certified security professionals at Motorola Solutions Network and Security Operations Center (NSOC) are dedicated to monitoring the secure state of your VESTA 9-1-1 system 24/7.

Using advanced automation and analytics in our ActiveEye™ platform, our security experts can pinpoint real threats while eliminating false positives and omissions. The platform provides a single pane of glass for your operations team to monitor the security of both your VESTA 9-1-1 system and your traditional IT network infrastructure, ensuring you're always in the loop.

## MANAGED DETECTION AND RESPONSE

Our Managed Detection and Response (MDR) services ensure you get optimal benefit from next-gen EDR solutions to eliminate blind spots. Our NSOC will continuously monitor all endpoint activity within your VESTA 9-1-1 system and analyze the data in real time to automatically identify and respond to threat activity.

## MANAGED DETECTION AND RESPONSE PLUS

Our MDR Plus services include EDR capabilities, along with a combination of Log Collection and Analytics plus network threat detection to continuously monitor for signs of malicious traffic inside your system. From this, actionable tickets can be assigned, investigated and resolved.

## ADVANCED THREAT INSIGHTS

Advanced Threat Insights extends the monitoring provided by MDR. It broadens the scope beyond investigating and responding to alerts, giving you detailed visibility into threats targeting your agency or organization. It includes access to a dedicated security expert, threat hunting, surface, deep and dark web searches, monthly reviews and more.

## MOTOROLA SOLUTIONS — YOUR TRUSTED PARTNER

As a leading provider of mission-critical solutions, we understand your mission can only be as secure as your partners enable you to be. Our goal is to provide you with transparency, accountability and security that's built-in from the start.

We believe that our set of highly knowledgeable people with industry certifications, best-in-class organizational policies and procedures and state-of-the-art automation and analytics tools enables us to uniquely deliver enhanced cybersecurity solutions that address your needs today and in the future.

## GLOBAL SCALE & EXPERIENCE

# 300+

SECURITY EXPERTS  
FOCUSED ON 24/7  
MONITORING &  
RESPONSE

# 9B

SECURITY EVENTS  
PROACTIVELY  
MONITORED EACH DAY

# 100%

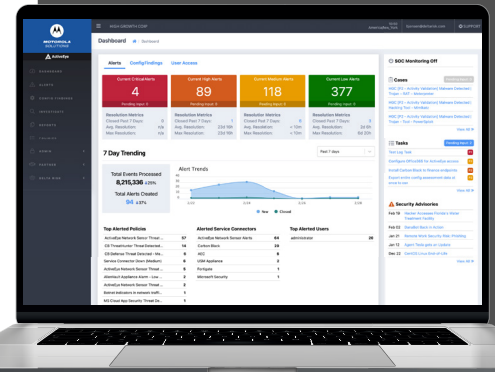

CO-MANAGED APPROACH  
FOR VISIBILITY AND  
CONTROL

# 20+

YEARS OF EXPERIENCE  
DEVELOPING  
CYBERSECURITY  
SOLUTIONS

## GET 24/7 CYBERSECURITY COVERAGE

Our ActiveEye<sup>SM</sup> platform provides comprehensive, 24/7 cybersecurity coverage, while our experts continuously monitor to detect and respond to threats.

Get complete visibility into all security activity via a single view.
