U.S. FEDERAL GOVERNMENT CYBERSECURITY ADVISORY SERVICES

For nearly a century, Motorola Solutions has engineered groundbreaking mission-critical technology solutions for the U.S. Federal Government. More than ever, the integrity, confidentiality and availability of government information is paramount to the success of your missions. As a result, we have built a complete portfolio of cybersecurity products and services designed to fully support the Federal government's current and future needs.

ROADMAP
TO BETTER CYBERSECURITY

Motorola Solutions Cybersecurity Advisory Services provide a valuable way to identify and prioritize issues that could impact your agency. In addition, U.S. Federal systems are required to comply with the Federal Information Security Modernization Act (FISMA) which invokes one of many processes (e.g., National Institute of Standards and Technology (NIST) Risk Management Framework (RMF) or for cloud systems, FedRAMP). Implementation of these frameworks and associated processes in many cases requires an independent assessment. Lunarline, a wholly owned Motorola Solutions subsidiary, is an accredited Third Party Assessment Organization (3PAO).

Our U.S. Federal advisory services team is comprised of practitioners with a broad range of expertise and experience in assessing, monitoring and responding to security risks and events, include capabilities associated with Governance, Risk and Compliance (GRC).

PARTNER WITH
SECURITY ADVISORS

There are five key areas where our experts can help. Penetration Testing including black/gray/white box as well as internal, external and wireless, mobile and web applications, social engineering, phishing and other variations. Risk Assessments can help you meet compliance requirements by analyzing your people, processes and technology and providing insights on strengths and weaknesses in your overall cybersecurity program.

Cyber Exercises are based on real-world scenarios and can provide insights into your team's ability to respond during a cyber attack. Incident Response Planning Exercises can help your team respond quickly and confidently in the event of a data breach or security incident. Cyber Program Development services can help inform strategy and compliance activities based on operational and business objectives.

CORE CAPABILITIES

- FedRAMP and StateRAMP Accredited 3PAO
- Risk Management Framework (RMF) Implementation and Assessments
- Vulnerability Scanning and Remediation
- Contingency Plan Development and Exercises
- Cybersecurity Exercises and Training

- Cybersecurity Strategy, Compliance and Program Management
- Incident Response Planning Exercises
- Cybersecurity Training and Workforce Development
- System hardening, baseline implementation, (e.g., Defense Information Systems Agency Security Technical Implementation Guides (DISA STIGS), Center for Internet Security (CIS) Benchmarks)
- Penetration Testing

MOTOROLA SOLUTIONS YOUR TRUSTED PARTNER

As a leading provider of mission-critical solutions, we understand your mission can only be as secure as your partners enable you to be. Our goal is to provide you with transparency, accountability and security that's built in from the start.

We believe that our set of highly knowledgeable people with industry certifications, best-in-class organizational policies and procedures and state-of-the-art automation and analytics tools enables us to uniquely deliver enhanced cybersecurity solutions that address your needs today and in the future.

VALIDATED PROTECTION

Gain comprehensive understanding of how well your security controls, policies and procedures are protecting your network, endpoints and cloud.

SCENARIO-BASED EXERCISES

Replicating both external and internal threats to your network and applications can identify avenues of attack that adversaries or insider threats could exploit.

SECURITY EXPERTISE

Motorola Solutions uses a multifaceted approach – one that integrates our team's expertise with a breadth of sophisticated technical tools and capabilities.
