MAKE THE BEST DECISION WHEN
AND WHERE IT MATTERS MOST

PMREXPO 2017

MOTOROLA SOLUTIONS

SOLUTIONS TO ENHANCE YOUR BUSINESS OPERATIONS

When your people and assets are constantly on the move, it's hard to keep track of everything to ensure optimal performance. Workers, dispatchers and managers need to stay constantly connected and informed, on-site or further afield, and Motorola Solutions has the answer. Mobile intelligence harnesses data by unifying applications, networks, devices and services to transform critical operations and work processes.

BUILDING EFFICIENT OPERATIONS, IMPROVING WORKER SAFETY AND DRIVING PRODUCTIVITY

In order to function effectively, organisations need efficient and reliable communication between staff, plus seamless integration of data, information and work processes. We will show how our unified communications solutions help create a collaborative environment between workers, supervisors, managers, equipment and processes to ensure increased productivity, faster problem resolution, enhanced safety and reduced operational risks.

ON OUR STAND: SOLUTIONS FOR BUSINESS USERS

EXTENSIVE PORTFOLIO OF DEVICES AND SYSTEMS

Easy-to-use entry level, mid-tier and fully-featured high tier models. Super-slim, discreet or rugged. From manufacturing to utilities, transportation to retail. Waterproof, super-stylish or ATEX certified. Whatever the requirement, Motorola Solutions has the right device for every user. All backed up with an extensive range of accessories and applications that allow the user to customise the solution to their specific needs.

At PMRExpo 2017, we will be showcasing a wide selection from our extensive range of PMR446, DMR, TETRA, Voice-Over-Broadband and LTE solutions along with supporting accessories, applications and services. All designed to keep your business-critical applications connected when you need them.

CONTROL ROOM SOLUTIONS

Integrating powerful voice and data communications with advanced fleet control and dispatch functionalities, Motorola Solutions Control Room systems maximise your operational effectiveness. Control room personnel are equipped with premium tools that allow them to organise and deliver routine tasks more efficiently, communicate better with teams in the field and make faster decisions when incidents happen.

EXTENDED, INTEGRATED COMMUNICATIONS

Now you can extend the reach of your radio communication to anyone with a smart phone or mobile device, anywhere they go. Manage workflow efficiently and help personnel stay safe with applications that send emergency alerts automatically. WAVE Work Group Communications provide a broadband push-to-talk solution that delivers real-time voice and data securely over any network using any device.

SEE THE LATEST ADDITIONS TO THE RANGE

SEE OUR MOST RECENT PRODUCT LAUNCHES ON THE STAND AND LEARN HOW THEY CAN DRIVE OPERATIONAL EFFICIENCIES AND ENHANCED PERSONNEL SAFETY.

MOTOTRBO™ SL2600: provides the power of instant, two-way radio communication without compromising on style. This new radio is packed with features and functionality including clear audio in analogue or digital mode, Bluetooth® 4.0 audio and data, integrated Wi-Fi® for remote programming, location tracking using iBeacons, and a virtual display and keypad that lights up when you need it and goes dark when you don't.

MOTOTRBO SLR 1000: low power repeater, high power functionality! The new MOTOTRBO SLR 1000 low power repeater has been designed to be easy to deploy inside or outdoors. It supports all MOTOTRBO system types, plus analogue conventional and MPT1327 and its compact, fanless IP65 design gives more flexibility for installation choices.

MOTOTRBO DP3661e: rugged, compact portable radio complements the DP3441e and features a full-colour 5-line display, indoor and outdoor location tracking with Bluetooth 4.0, GPS and GLONASS, integrated Wi-Fi® for remote programming, built-in accelerometer for man down functionality, clear audio and long battery life up to 27.5 hours. All packed into a small waterproof package.

MOTOTRBO DP4801e supports WAVE client: for the ultimate in unified communications. Use the radio's RF capability for normal operations and stay in touch when out of radio coverage by switching to WAVE broadband push-to-talk using the DP4801e's integrated Wi-Fi.

XT600d Series: our first digital PMR446 radio also supports analogue PMR446 for ease of migration. The new radio offers individual and group calling, caller ID, remote monitor / disable, texting, audio recording and more. Two models are available: the XT660d supports analogue and digital PMR446 and the XT665d adds support for LPD433.

DIMETRA™ Express: this new modular system integrates the switch and base radios to give a single-site TETRA system. DIMETRA Express offers the voice, short data, and telephony services your teams demand. And it's expandable to multiple sites, so it can grow as your business does.
