

IMPROVING SAFETY WITH INTELLIGENT TWO-WAY RADIO

Reduce risk, minimise downtime and protect staff and passengers, with the latest digital two-way radio solutions for the transport sector. Here are the key points to consider when improving your communication network for the purpose of heightening safety measures.

LOCATION AND MOVEMENT TRACKING

Location, Lone Worker and Man Down functions enable fast, effective response if a worker fails to respond, or appears to have fallen

**PROMPT ACTION,
IMPROVED WORKER SAFETY**

ATEX CERTIFIED

Radios designed, built and approved to operate in hazardous environments

**SAFER WORKING,
REDUCED DOWNTIME**

CLEAR CONVERSATIONS

High-quality audio and noise-cancelling technology

**AUDIO CLARITY, UMISTAKEABLE
COMMUNICATION**

PUSH-TO-TALK EVERYWHERE

WAVE Work Group Communications connects the workforce across smartphones, PCs, landlines and more with PTT capabilities

**COLLABORATIVE COMMUNICATION,
FASTER RESPONSE**

REMOTE MONITORING

Activate a worker's radio microphone remotely, to listen in if they are not responding to alerts

**UNINTRUSIVE OBSERVATION,
PEACE OF MIND**

HANDS-FREE WORKING

VOX voice-activated communications and Bluetooth™ wireless accessories allow workers to communicate with both hands free

**TACTICAL ACCESSORIES, MINIMISED
DISTRACTIONS AVOID DISRUPTION**
