

Plug-and-play access to more video

The presence of a video camera is almost a given these days, anywhere you are. The challenge is accessing these video feeds when needed. You can already view video from almost any source with CommandCentral Aware – including your video management systems as well as body, in-car and license plate recognition cameras. Now, you can expand coverage by securely accessing video from **your community partners – including businesses, schools and places of worship** – with our easy-to-deploy edge appliance.

Edge Appliance for CommandCentral Aware

Securely access live video from your community partners with the Motorola Solutions edge appliance. The edge appliance connects up to 30 IP cameras on a network to your public safety command center. The appliance is manufactured by Dell and arrives pre-configured with secure Motorola Solutions software.

Easy to deploy

Set up of the edge appliance is simple and easy. After a few straightforward steps, which can be completed by you or your community partner, cameras are available to be livestreamed in your public safety command center. Cameras that support ONVIF Profile S allows for automatic discovery and provisioning in CommandCentral Aware.

Connect up to 30 cameras

The edge appliance connects up to 30 IP camera on a network from a small business or other private organization. Supported cameras are immediately discoverable in your command center after installation. Stream up to eight video feeds at a time from one connected device into CommandCentral Aware.

Encrypted and secure

The edge appliance is encrypted and secure from end to end, from video storage to streaming. It is built using zero trust architecture that is designed to prevent data breaches and protects against potential bad actor threats on the network. The device will immediately stop transmitting upon detecting a breach and will be disabled for use.

KEY SPECIFICATIONS

Connected Cameras (up to)	30
