SOLVE CASES FASTER WITH AUTOMATED LPR CONNECTIONS

COMMANDCENTRAL RECORDS AND VIGILANT PLATESEARCH INTEGRATION

When a case is open, moving quickly is critical. Motorola Solutions' CommandCentral Records and Vigilant PlateSearch, which is part of the Vigilant LEARN platform, now work together to help build and close cases quickly.

The greatest advantage for public safety agencies is to harness the information that surrounds them. Vigilant PlateSearch provides access to billions of license plate detections and patented vehicle location analytics, going beyond basic searches and hot list alerts. CommandCentral Records pulls computer-aided dispatch, digital evidence management and citizen input data into a unified, more complete and accurate incident summary. Together, CommandCentral Records and Vigilant PlateSearch help agencies make connections faster, proactively locate vehicles involved in an incident, and correlate data between your software investments.

CORRELATE

Make connections between records management and license plate recognition data to build and solve cases faster.

AUTOMATE

Automatically link license plate recognition data in the incident record, saving valuable time with direct LEARN database access.

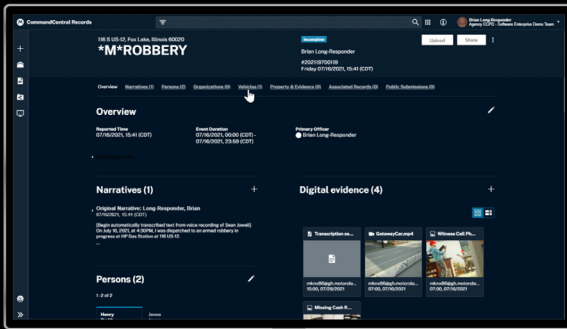

INTEGRATE

Get more from your technology investments by integrating your software so you don't miss important data connections.

HERE'S HOW IT WORKS

1

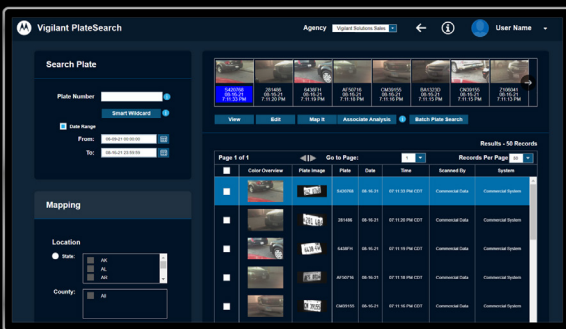

Add the information for any vehicles associated with the incident.

2

The incident record indicates the number of detections that exist for any license plate associated with the incident.

3

Select the direct link in the incident record to view the license plate database results for more detailed vehicle information.

THE INDUSTRY'S MOST COMPLETE SOFTWARE SUITE

You depend on solutions that help deliver on the promise of a safer world. CommandCentral Records and other applications in our CommandCentral software suite are designed to bring clarity to decisions and simplify collaborative workflows. From call to case closure, CommandCentral connects all data to create actionable intelligence, eliminates barriers to heighten collaboration and delivers the complete, 360° Incident.

The integration with Vigilant PlateSearch is just one of the benefits of CommandCentral Records.
