CONNECTED PATROL

SAFETY & SERVICE - DELIVERED FOR ALL

Community expectations for law enforcement service and accountability are increasing while agency budgets remain the same. Meet the demands of modern policing with voice, video and data unified across your workflows on a secure and scalable platform, so you can collaborate more effectively and make more informed decisions while strengthening public trust.

DETECT & ANALYZE

Quickly identify and focus attention on emerging events and determine potential risks.

COMMUNICATE & RESPOND

Seamlessly connect across teams and share intelligence that enables the safest outcomes.

INVESTIGATE & REPORT

Securely capture, manage and share data across functions. Streamline case management.

Detect hot-listed license plates from our AI-enabled in-car video system.

Automatically activate body-worn cameras with a radio emergency button press.
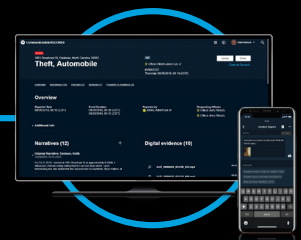

Remotely upload body-worn and in-car video that is automatically tagged to an incident report.
