CURVE two-way radios firmware to be updated from:-Firmware Version R01.00.01 to R01.01.00 Codeplug Version R01.00.00 to R01.01.00 WIFI Board Version R02.00.01 to R02.01.00 Affected Tanapa :-

SUPER TANAPA	Tanapa	Sales Model
PMUF1983A	PMUF1982A	DLR110NBHLAA
PMUF1981A	PMUF1982A	DLR110NBHLAB

This new version provides below features and capabilities

- 1. Virtual Channel
- 2. Group Voice Message
- 3. Intelligent Insight
- 4. Storewide announcement
- 5. WiFi Connection Indication
- 6. WiFi Signal strength indication.

Equipment/Tools needed to perform software update

- 1. Prepare the below equipment.
 - a. CPS Cable kit is HKKN4027A.
 - b. Single Unit Charger/docking station PMPN4586A.

Computer System Requirements

- 1. Computer with Windows 10 operating system.
- 2. Computer with USB port.

<u>Note</u>

- 1. Only 1 radio can be updated at any one time.
- 2. Please ensure the radio battery is fully charged before updating commences.
- 3. Please ensure no other FTDI cable is connected to the PC and only CPS cable is connected.

Setup Steps (one time)

- 1. Connect the programming kit docking/charging station to computer using the USB programming cable from the programming kit.
- 2. On the programming cable PMKN4154A, please make sure to set the mode switch to Digital CPS.
- 3. Observed your computer will scan and install the programming cable driver automatically at the background (task tray for Windows computer). This will take a while.
- 4. Please wait until the driver installation is completed.
- 5. Download and double click to install the Update Tool application (provided by Motorola Team) into the computer.

6. Click "Next" to install proceed installation.

7. Click to accept the agreement and click "Next".

8. Click "Next" to proceed install in default location in your computer. **Please do not change the installation path.**

15. Please wait for radio to complete the restart before unplugging the radio from the docking/charging station.

- 16. If you see failure, please try power cycle your radio and perform an upgrade again.
- 17. If the radio still cannot upgrade again or if the radio shows any symptom cannot power up or showing any failure, please return your radio for warranty.

Test Steps

After upgrade, follow the steps to check the radio functionality:

- 1. Power up test power up the radio as usual. Check if the radio powers up correctly and show the channel.
- 2. Transmit test press PTT and ensure the other radio receives the transmission / can hear the audio.
- 3. Receive test ensure this radio received the audio from the other radio.
- 4. Volume up and down test test volume up and check the audio volume is increased. Test volume down and check the audio volume is decreased.
- 5. Channel test change channel on two radios and test by transmitting from one radio and receiving on the other radio. Check if the audio is transmitted through.

Minimum PC Spec requirement

- 1. Intel core i5-3320M @2.60 Ghz
- 2. 8 GB RAM
- 3. Windows 7 Professional SP1, 64-bit OS
- 4. 320 GB HDD

<u>Notes</u>

*There will be a chance of failing during the update depending on the computer usage and environment.

*Please close all the running applications before start updating.

*If failure persists, please stop upgrade using this computer and try another computer. If failure still persists, please do not perform upgrade and get Motorola to support.
