

# Security bundle: video + voice

Powerful alone. Game-changing together.

Unlock efficiency and work smarter with your VB400 body camera, MOTOTRBO two-way radio and Evolve smart handheld device to enhance security, minimize inventory loss, and ensure a safer, more efficient healthcare environment.

## Safeguard your staff

De-escalate incidents with your VB400 body camera with live-streaming video while sharing immediate details from your radio to remote colleagues, enhancing situational awareness and coordinating an effective response.

## Protect your facility

When suspicious activity is detected, such as attempted theft of hospital linens, scrubs or medication, discreetly activate your body camera and alert the security team via radio communication.

## Complete evidence collection

The VB400 body camera footage serves as valuable evidence in cases of prescription theft or false accusations. It provides clear documentation of the incident, including the actions of the perpetrator and any interactions with the hospital staff.

Take advantage of a fully customizable device and intuitive software that's easy to set up and even easier to use.

# Key products

## Body camera

The VB400 body camera is a connected public-safety grade, flexible solution. With the ability to trigger recording on multiple VB400s via Bluetooth for instant activation during incidents, as well as connections with MOTOTRBO radios, you can capture evidence in even the most unexpected moments.

## Device and video management software

VideoManager EX is designed to make body camera management easy — so you can administer your body cameras, and the videos they capture, without extensive training and maintenance. Whether you want to livestream footage or simply store it for later, VideoManager EX minimizes time at the computer and maximizes your hardware investment instead.

## Two-way radios and smart handheld

MOTOTRBO two-way radios help connect workers with clear, reliable communication. R7 and Ion models can pair with your VB400 body camera to enhance their safety and productivity. One button can then do the job of two: whenever the radio's emergency button is pressed, your VB400 will immediately start recording. And if you can't get to your emergency button, the radio's Lone Worker and Fall Alert features can automatically trigger an emergency alert and start recording on the camera.

Evolve is a rugged, smart handheld Android device, compatible with LTE and CBRS, that can run your Google and Android apps, including VB SmartControl for a direct connection with the VB400 body camera. It can even provide remote access to VideoManager EX, allowing authorized users access on the move.

## Safer hospitals

Providing clear and reliable video documentation alongside instant communication enables staff to quickly de-escalate situations, effectively respond to challenges including theft, coordinate tasks and ensure the well-being of both employees and patients.

## The power of video and voice

Whether it's addressing security concerns, assisting patients or managing everyday operations, the connection between body cameras and radios keep everyone on the same page, fostering a culture of transparency and ultimately contributing to a more secure and productive environment.

At Motorola Solutions, we build the best possible technologies across every part of the safety and security ecosystem to help protect people, property and places. We're connecting technologies and people in one ecosystem, enabling a new kind of safety. With our solutions, people can collaborate. Information flows where it's needed. Performance improves. Lives are protected. And safety becomes more than momentary. It becomes the constant that a better world — with safer communities, safer schools, safer hospitals, safer businesses, safer everywhere — is built on.
