

# GOOGLE WORKSPACE SECURITY FOR ENTERPRISE IT

## 24/7 MONITORING AND PROTECTION

Many security teams worry that managing Google Workspace (formerly G Suite) security will increase the demands on their already overextended resources. But moving to the cloud doesn't need to add security complexity. Motorola Solutions advanced security platform, ActiveEye<sup>SM</sup>, combines intelligent automated analysis with 24/7 monitoring to secure your environment. It cuts out the noise and helps your security team focus on the things that really matter.

## INCREASED VISIBILITY

Google Workspace (formerly G Suite) is a popular choice for small and mid-sized organizations for its email and productivity tools, allowing them to reduce the costs of keeping up with software licenses, installations and IT requests. If you're migrating to or already using Google Workspace, however, you may find that your existing security solutions aren't the best options for monitoring user activity or addressing potential threats.

Our advanced cybersecurity platform integrates with Google's APIs to collect detailed data from your environment. It uses the latest machine learning techniques to analyze event information and identify the highest priority threats. We give you the insights and tools you need to proactively protect users and sensitive data. Our 24/7 experts act as an extension of your inhouse security team.

## FEATURES

- Automated Threat Detection with Machine Learning
- 24/7 SOC for Real-Time Threat Analysis and Remediation
- Unified Interface for Multi-Cloud and On-Premise Security
- Integrated Threat Intelligence and Reputation Data
- Flexible Notifications, including PagerDuty and Slack Integration
- Long-Term Security Event Data Retention
- PCI and HIPAA Compliant

### COST EFFECTIVE

Cloud-enabled protection eliminates the need for additional cloud infrastructure, or on-premise hardware and software solutions.

### FAST DEPLOYMENT

Get up and running quickly and easily with Our simple, API-based integration with Google security features.

### IMMEDIATE RESULTS

Get visibility and insight into Google Workspace activity from day one with unmatched detection, monitoring and reporting.

## KEY CAPABILITIES

### INTEGRATE WITH GOOGLE WORKSPACE SECURITY FEATURES

Our security platform interfaces directly with native security capabilities through APIs to collect and analyze detailed security event information, identifying the events and threats that truly matter.

### MONITOR GOOGLE WORKSPACE ACCOUNT SECURITY

Motorola Solutions monitors Google Workspace user account security events in real time to detect possible account attacks and abuse.

### DETECT GOOGLE WORKSPACE USAGE ANOMALIES

Behavioral profiling technology monitors Google Workspace usage in real time, identifying changes in user behavior so you can investigate and respond to potential problems quickly.

### STRENGTHEN GOOGLE WORKSPACE COMPLIANCE READINESS

Our ActiveEye security platform has compliance reports that map to organizational or industry compliance requirements, or general-purpose frameworks and benchmarks.

### UNIFY YOUR CLOUD SECURITY APPROACH

ActiveEye offers a unified model for implementing security across multiple cloud providers, bringing both simplicity and greater security effectiveness.

### UNLOCK NEW VALUE FROM YOUR EXISTING SECURITY TOOLS

In addition to Google Workspace, our advanced cybersecurity services give you visibility into other cloud environments, along with your network and endpoints, for a unified view without added complexity.
