

BE RESILIENT: PROTECT YOUR IT NETWORK WITH ADVANCED CYBERSECURITY SERVICES

PROTECT YOUR PUBLIC SAFETY IT NETWORK

As threats continue to skyrocket, protecting your IT network is more important than ever. Motorola Solutions offers a dynamic combination of cybersecurity expertise, advanced threat analytics and comprehensive, up-to-the-minute notifications, all in one unified, cloud-based platform.

DETECT ENTERPRISE NETWORK THREATS

Built for resource-constrained IT security teams, our advanced network protection solutions are cost-effective, quick to deploy and easy to use. They eliminate the need to set up, integrate and maintain multiple point security solutions in your data center. Our cloud-based security platform offers a low total cost of ownership (TCO) and flexible, scalable deployment options for teams of any size or budget.

Best of all, we offer a fully-managed solution, supported by our world-class Security Operations Center (SOC). Our advanced security monitoring platform provides multiple essential security capabilities in one SaaS solution, giving you everything you need for threat detection, incident response and compliance management—all in a single pane of glass.

ASSET DISCOVERY

Our API-powered asset discovery can help you detect network, software, and services.

VULNERABILITY ASSESSMENTS

Find vulnerabilities faster with network vulnerability scanning and Network Intrusion Detection (NIDS) monitoring.

SIEM & LOG MANAGEMENT

Correlate events more effectively with long-term log management and integrated threat intelligence from the Open Threat Exchange® (OTX).

BEHAVIOURAL MONITORING

Detect malicious activity from inside or outside your network. Use advanced analytics to detect inappropriate use of resources.

KEY CAPABILITIES

CENTRALIZED SECURITY MONITORING FOR YOUR ON-PREMISES ENVIRONMENTS

Get powerful threat detection capabilities across your on-premises environment to eliminate security blind spots and mitigate unmanaged shadow IT activities.

- Windows and Linux endpoints on your network
- Virtual on-premises IT on VMware/Hyper-V Physical IT infrastructure in your data center

POWERFUL SECURITY ANALYTICS AT YOUR FINGERTIPS

With centralized security monitoring of your on-premises IT environments, you can efficiently search and analyze data from across your IT infrastructure.

- Search and analyze to find threats and investigate incidents
- Create and export custom views for compliance reporting
- Pivot between assets, vulnerabilities and event data to pinpoint the information you need

ADVANCED AUTOMATION RULES TO REDUCE NOISE

Supported by our 24/7 world-class SOC, our advanced cybersecurity platform automates actions and responses to filter out false positives and reduce alert fatigue.

- Reduce alert "noise" with suppression rules
- Generate custom alerts based on any parameter
- Auto-respond to events with orchestration rules
- Create orchestration rules for third-party applications

MOTOROLA SOLUTIONS — YOUR TRUSTED PARTNER

As a leading provider of mission-critical solutions, we understand your mission can only be as secure as your partners enable you to be. Our goal is to provide you with transparency, accountability and security that's built-in from the start.

We believe that our set of highly knowledgeable people with industry certifications, best-in-class organizational policies and procedures and state-of-the-art automation and analytics tools enables us to uniquely deliver enhanced cybersecurity solutions that address your needs today and in the future.

GLOBAL SCALE & EXPERIENCE
