SPECIFICATION SHEET - APAC

Evolve to Better Communication and Value

You can afford to enhance your communications with the digital performance of eVerge $^{\mathbb{M}}$ two-way radios. eVerge $^{\mathbb{M}}$ radios are compact and precision-engineered to deliver value without sacrificing quality — giving you more capabilities and the flexibility you need to communicate at your best.

Conversion Made Easy with Analog Integration

 $eVerge^{M}$ radios operate in both analog and digital modes and can be used with any existing analog two-way radios.

Do Digital Right: Stay Compatible and Maximize Efficiency

 $eVerge^{M}$ digital radios operate using the TDMA protocol for spectrum and power efficiency and lower total equipment cost compared to FDMA.

Better Radio Call Quality

Digital eliminates noise and static from voice transmit to only deliver the intended voice message crisply and clearly. eVerge $^{\mathbb{M}}$ digital radios feature the AMBE+2 $^{\mathbb{M}}$ vocoder for enhanced voice quality.

Better Message Control and Privacy

Control who you call and who gets your message in digital mode. Digital radios each have a unique ID enabling users to select who they need to call or send a text message without including others.

Transmit Interrupt

When seconds matter, transmit interrupt allows an operator to halt or "interrupt" any current transmission, in favor of a priority message. Transmit Interrupt functionality ensures your critical messages will connect.

Better Coverage and Connection Monitoring with ARTS II™

Get ultra-clear audio right up to the edge of the transmit range. And, with Vertex Standard's exclusive Auto-Range Transpond System [ARTS II], you will always know when you are in or out of range with another ARTS II-equipped radio.

Worker Safety Features

As with all Vertex Standard mobile radios, $eVerge^{m}$ mobile radios include Emergency alert for enhanced driver safety.

Operators can activate the Lone Worker function when leaving equipment or a vehicle temporarily. If a problem arises while away, the radio switches to Emergency mode to alert help.

Option Board Expandable for Additional Applications

The EVX-5400 mobiles are designed for future feature expansion and supporting third-party application development such as location tracking with GPS, rolling code encryption, etc.
